Baguio City, Benguet 2600 • harrydenesia44@gmail.com • +639389498904

Professional Summary

Information Technology professional with hands-on experience developing full-stack web and mobile applications using React, TypeScript, Python, Node.js, SQL, and Git/GitHub. Experienced in building authentication flows, dashboards, database-driven applications, APIs, and administrative systems. Comfortable troubleshooting technical issues, working independently, and adapting to new tools and technologies.

Education

University of the Cordilleras

Bachelor of Science in Information Technology
Dean's Lister

Gov. Pack Rd. Baguio City

Experience

Money Trees

Frontend Web Developer Intern

La Union

May 2025 – July 2025

- Developed and maintained features for a cross-platform mobile application using **React Native, Expo, and Solito**.
- Built responsive login, registration, and account verification flows with secure authentication handling.
- Developed customer-facing dashboards for browsing, saving, and booking categorized services.
- Performed QA testing, debugging, and iterative improvements across Android and iOS.
- Refactored reusable UI components to improve maintainability and consistency.
- Used **Git and GitHub** for version control and collaboration in an Agile workflow.

University of the Cordilleras

IT Systems Support

Gov. Pack Rd. Baguio City

April 2024 – Dec. 2024

- Diagnosed and resolved hardware and software issues, including RAM and storage replacement, OS installation, driver issues, and malware removal.
- Provided technical support for university offices, workstations, PC setups, and day-to-day technical requirements.
- Assisted users with technical issues while developing practical troubleshooting and communication skills.

Projects

- **Online Enrollment & Administrative System:** Built a full-stack web application for online enrollment, student records, academic management, administrative workflows, dashboards, and reporting.
- **Online Booking & Scheduling Platform:** Developed web and mobile functionality for service discovery, customer bookings, authentication, scheduling, and customer/merchant dashboards.
- **Volunteer Dispatch System:** Developed a database-driven platform for coordinating volunteers and service requests using Python/FastAPI, React, PostgreSQL, Redis, and REST APIs.

Technical Skills

Development: React, React Native, TypeScript, JavaScript, Python, Node.js, FastAPI, REST APIs, HTML/CSS, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, SQL

Tools & Deployment: Git, GitHub, Vercel, Render, Docker, Figma

Technical Support: Hardware/software troubleshooting, PC maintenance and repair, OS & driver installation, QA testing
